The Overview of ICT Jobs in Clarity Techworks Sdn.Bhd

INTRODUCTION :-

The technology industry, according to the industrial talk, is a dynamic and fulfilling field with lots of opportunities for both professional and personal growth. People can succeed in this fascinating and dynamic field by acquiring the required skills, accepting challenges, and working well with others.

THE CONTENTS :-

- Android : Develop mobile application specially in Play Store
- Web Developer : Create the webpage and website in Internet
- Skills nurtured during work : Punctuality, Creativity and Critical Thinking
- QA testing Analyst : Testing the overall quality of product(app/website) and fix the bug before released for production

REFLECTION :

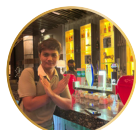

- Reporting : This industrial talk explains about the roles of every job at a fintech company
- Responding : I learnt about how many things regarding ict jobs and its role that I didn't understand or didn't know
- Relating : With my limited knowledge and inexperience in the fields worklife, at first I was unsure what type of different application used to operate as a certain role in the workforce such as UI/UX developer.
- Reasoning : Working in ICT requires many skills and softskills to be used during the process and after the development of the app,there are many jobs and responsibility that a person holds when working in the ICT field
- Reconstruction : I plan to further my research in the ICT workfield and prepare myself for the challenge

EXECUTIVE SUMMARY :

Clarity Tech Works representatives gave a webinar to UTM Faculty of Computing students, discussing the technology industry, job scopes, career developments, and tools used. They emphasized the importance of developing both technical and generic skills for success in the industry. introduction
